STATE CLEARINGHOUSE

NEWSLETTER

September 16-30, 2005

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 16-30, 2005.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003

To: All CEQA Lead Agencies

From: Terry Roberts, Director, State Clearinghouse

Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CD must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

2005092082	<p>Sacramento River National Wildlife Refuge: Draft EA for Restoration Alternatives U.S. Fish and Wildlife Service Red Bluff--Tehama</p> <p>This Comprehensive Conservation Plan will guide management of the Sacramento River National Wildlife Refuge for the next 15 years. Establishes vision for Refuge and sets goals and management objectives and identifies strategies for achieving refuge purposes.</p>	EA	10/24/2005
2005094004	<p>Mammal Damage Management U.S. Department of Agriculture --</p> <p>The United States Department of Agriculture, Animal and Plant Health Inspection Service (APHIS), Wildlife Services program (WS) proposes to continue the current integrated wildlife damage management (IWDM) program in the State of California to reduce mammal damage to property, public health and safety, agricultural resources, and natural resources.</p> <p>Wildlife Services wildlife damage management would be conducted on public and private property in California when the property or resource owner or manager requests assistance. An IWDM strategy would be recommended and use, encompassing the use of practical and effective methods for preventing or reducing damage while minimizing harmful effects of damage management measures on humans, target and non-target species, and the environment.</p>	EA	10/21/2005
2002071101	<p>Mariposa County 2005 General Plan Draft EIR Mariposa County --Mariposa</p> <p>The project under consideration is the proposed 2005 General Plan update for Mariposa County. The proposed General Plan provides a basis to guide future development and decision-making via land use designations, goals, objectives, policies, and implementation measures. Prior to adoption of the General Plan update, the County must identify and document the potential environmental impacts of the project in accordance with CEQA. The draft EIR for this project has been prepared to fulfill these CEQA requirements. Each topical section in the draft EIR presents information in five parts: an introductory paragraph that describes the scope of the issue under consideration, the Affected Environment (Setting), the Evaluation Criteria with Points of Significance, the General Plan Policies and Implementation Measures, and the Environmental Consequences (Impacts). When needed and if available, mitigation measures are recommended to reduce any identified significant impacts.</p>	EIR	10/31/2005

2005091094	Ormond Beach Specific Plan Oxnard, City of --Ventura The Northern Subarea consists of the approximately 323 acres of the project area that lies north of Hueneme Road. It is proposed to accommodate a mix of uses including up to 1,283 residential dwelling units of various types and densities; an elementary school; a high school (either within the Study Area or East of Olds Road); a community park; neighborhood parks; a 10-acre lake; a mixed-use commercial marketplace; light industrial uses; and open space and trails.	NOP	10/17/2005
2005091095	Tentative Parcel Map No. 33942 and Plot Plan No. 20699 Riverside County Planning Department Perris--Riverside Tentative Parcel Map No. 33942 is a proposal to subdivide 69.41 acres into 5 parcels. Plot Plan No. 20699 is a proposal to develop 5 industrial buildings on 69.41 acres.	NOP	10/17/2005
2005091096	Lompoc Hospital Relocation Project Lompoc, City of Lompoc--Santa Barbara The proposed project involves the relocation of the existing hospital to an 8.0-acre site in the southeastern corner of the City of Lompoc. The new hospital facility is proposed as an approximately 111,000-square foot, 60-bed facility.	NOP	10/17/2005
2005092083	Sonoma Valley Recycled Water Project (SVRWP) Sonoma County Water Agency --Sonoma The SVCSD operates a wastewater treatment facility within the Sonoma Valley that, during certain times of the year (November through May), is permitted to discharge treated water to San Pablo Bay. In order to provide additional flexibility for its regional water management responsibilities, the Agency views the use of recycled water as a viable and environmentally responsible means of offsetting demand on natural water supply sources. The Agency has identified approximately 2,800 acres of agricultural and urban lands within Sonoma Valley that could potentially use recycled water. The purpose of the SVRWP is to provide a reliable alternative source of water for agricultural and urban use to reduce reliance on natural regional water supplies and to address regional water supply and regulatory issues.	NOP	10/17/2005
2005092084	Elk Grove Unified School District High School/Middle School #10 Elk Grove Unified School District Sacramento--Sacramento The proposed project would involve the construction and operation of a joint high school/middle school campus. The proposed project would provide educational and recreational facilities for 7th to 12th grade students on approximately 120 acres. The proposed project site would be located on five parcels south of Florin Road between Bradshaw Road and Excelsior Road in Unincorporated Sacramento County.	NOP	10/17/2005
2005091089	Berryman Canyon Storm Drain Encinitas, City of Encinitas--San Diego The project proposes to construct a 200-foot-long, 30-inch diameter storm drain pipe.	Neg	10/17/2005

2005091091	Agricultural Drainage Replacement Projects (3); Avenue 64 West Drain, Jackson 0.5 Drain, Avenue 64-Harrison Street North Drain Coachella Valley Water District --Riverside Approximately 17,000 lineal feet of deteriorated concrete pipelines (agricultural drainage lines) will be replaced with high-density polyethylene (HDPE) perforated pipe at three locations (Avenue 64 West Drain, Jackson 0.5 Drain, Avenue 64-Harrison Street North Drain) near the community of Thermal in unincorporated Riverside County. The agricultural drain lines are required in order to collect perched groundwater and convey it from agricultural lands into the Coachella Valley Stormwater Channel. The purpose of this project is to replace 40 to 50-year-old agricultural drain tiles that are deteriorated along three sections of the agricultural drainage system. The HDPE pipe will be installed along the same alignments (easements) of the existing deteriorated drain lines at a depth of 8 to 15 feet. Some dewatering may be required for the project.	Neg	10/17/2005
2005091092	Bombay Beach Lift Station 51-01 Renovation and Sewer Rehabilitation Coachella Valley Water District --Imperial The Bombay Beach Lift Station 51-01 Renovation and Sewer Rehabilitation project consists of the following: - Demolition of existing lift station (including pumps, motors, pipes, appurtenances); - Site improvements (grading, fencing); - Submersible-type pump station (2 pumps, motors, pipes, appurtenances); - 8-foot diameter wet well; - 8 feet high by 480 feet long concrete block wall enclosure; - Emergency generator; - Electrical, instrumentation and control panels; - Metal canopy with structural steel supports; - Approximately 80 feet of 12-inch VCP pipe and 1 manhole; - Approximately 310 feet of 6-inch PVC pipe; - Rehabilitation of approximately 250 feet of 8-inch sewer line; - Renovation of 9 manholes; and - Test, start-up and training for the new lift station facility. Construction of the Bombay Beach Lift Station 51-01 Renovation and Sewer Rehabilitation project is to take about 270 construction days; the targeted completion date is October 2006.	Neg	10/17/2005

2002041129	Canyon Sewer Cleaning Program/Long-Term Canyon Sewer Maintenance Program San Diego, City of --San Diego DFG is intending to execute a Lake and Streambed Alteration Agreement (SAA# 1600-2004-0385-R5) pursuant to section 1602 of the Fish and Game Code to the project applicant, City of San Diego, Metropolitan Wastewater Department. The applicant proposes to alter the stream to widen a portion of the San Diego River to accommodate wetland vegetation. The created basin bottom will be graded to an elevation approximately 2 feet above the existing San Diego River channel and will be planted with native riparian vegetation. In order to prevent increased scouring within the San Diego River channel, the riparian mitigation area is to be partially separated from the main channel by a low earthen/vegetated berm. The berm will prevent effective flows within the San Diego River from being diverted in to the created riparian mitigation area. The slopes of the basin will be graded at a 3:1 ratio from the bottom of the expanded creek bed up to meet the existing upland grade. Approximately 3.63 acres of riparian habitat will be created within the new	NOD

2005082003	<p>Phoenix Lake Road Bridge Replacement Project - Bridge No. 32C-030 / Caltrans Project No. BRLO-5932(007)</p> <p>Tuolumne County</p> <p>Sonora--Tuolumne</p> <p>Replacement of Bridge No. 32C-030 on Phoenix Lake Road over Sullivan Creek through the Highway Bridge Replacement and Rehabilitation Program (HBRR) under the Federal Highway Administration (FHWA) due to the substandard width, strength, and hydraulic capacity of the bridge, which was constructed in 1948. The existing bridge will be replaced with a pre-cast reinforced concrete structure with a single 60-foot span and roadway width of 40 feet. The waterway clearance width will be widened from 20 feet to 42 feet and the roadway approaches will be reconstructed at each end of the bridge to conform to the existing roadway and improve the alignment to provide stopping sight distance for a 30 mile per hour design speed. Reconstruction of the north approach will be 350 feet long and the south approach will be 140 feet long. A retaining wall, approximately 209 feet in length, will be constructed along the edge of the existing roadway east also entails acquisition of 0.901 +/- acre of road right-of-way and 0.193 +/- acre of temporary construction easements to facilitate replacement of the bridge and replacement of Tuolumne Utilities District's 12-inch Twain Harte Interceptor sewer main. The project site consists of 1.17 +/- acres located within the existing and proposed right-of-way of Phoenix Lake Road and temporary construction easements.</p>	FIN

	<p>The City of Santa Clara owns property adjacent to the 2.3-acre site. An electrical substation and access road are planned on this property by the City of Santa Clara's municipal utility, Silicon Valley Power. Under one project scenario, a 40-foot wide, approximately 0.2 acre strip of the City property east of the site would be used as a shared access and/or as an emergency vehicle access (EVA) for the proposed residential project. Under a second project scenario, none of the City property may be used as access to the site, whereby up to 4 units could be removed from the 59-unit project. The Draft EIR will address one of these two project scenarios as the proposed project in the Draft EIR.</p>		
2005092093	<p>South Hayward BART/Mission Boulevard Concept Plan Hayward, City of --Alameda</p> <p>The Concept Plan will illustrate potential future redevelopment of the study area and will provide an overall circulation pattern with transportation linkages to the South Hayward BART Station. For purposes of analysis, the environmental impact report will address future potential redevelopment of the study area under three alternative land use scenarios/concepts: Suburban Concept, Urban Concept and a Blended Concept. The project also includes the following related actions:</p> <p>a) Proposed amendments to the City of Hayward General Plan, including the General Plan Land Use Map, for parcels within the study area under each scenario, to include new General Plan land use residential density categories of 34.8 to 75 units per net acre and 75 to 100 units per net acre to accommodate higher density housing proposals around the South Hayward BART Station and along Mission Boulevard.</p> <p>b) Proposed amendments to the Hayward Zoning Ordinance to rezone parcels within the study area under each scenario and proposed amendment to the City of Hayward Zoning Ordinance establishing a new district and related design guidelines.</p>	NOP	10/18/2005
2005092094	<p>Costco Warehouse Project San Jose, City of San Jose--Santa Clara</p> <p>The proposed project is the construction of a new Costco Warehouse, tire center, and retail gas station on a 13.55 acre industrial parcel in the City of San Jose. The stated goal of the applicant is to develop a commercial business. The proposed project will require the issuance of two Conditional Use Permits for construction of the proposed warehouse and gas station. The site is designated as Industrial Park with a Mixed Industrial Overlay in the Land Use/Transportation Diagram of the San Jose 2020 General Plan, and is zoned IP: Industrial Park. The proposed commercial uses would be permitted under these existing designations.</p>	NOP	10/18/2005

	Alteration Agreement number 1600-2005-0544-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, James G. McKenna / Santa Cruz County Resource Conservation District.		
2004112063	Master Permit for Env. Enhancement Projects Santa Cruz County Capitola, Santa Cruz, Scotts Valley, Watsonville--Santa Cruz The goal of the project is the elimination of a 20 foot x 30 foot stand of Arundo on the east (left) bank of Soquel Creek at 3535 Main Street, Soquel. Eradication will require at least two seasons of work. The "cut stump" method will be used in the first year, to be followed by the seeding of a temporary erosion control mix. If regrowth of Arundo occurs following that, a repeat cutting and herbicide application will be done. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0543-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, James G. McKenna / Santa Cruz County Resource Conservation District.	NOD	
2005011061	The Point at Seaside Seaside, City of Seaside--Monterey The project site is a vacant 9,780 square-foot, triangular-shaped parcel located at the intersection of Del Monte Boulevard and Fremont Boulevard. The plans propose an overall building size of 10,430 square-feet. The building will contain 2,250 square-feet of commercial floor space consisting of five two bedroom, one-bath condominium townhouses and one one-bedroom, one-bath condominium townhouse. The proposed shared subterranean parking area contains 9 parking spaces for commercial uses and 11 parking spaces for the six residential units. A 24-foot wide driveway from Del Monte Boulevard provides the sole access to the project's parking area.	NOD	
2005022024	Kit Carpenter Zone Change (Z-04-11) Siskiyou County Planning Department --Siskiyou The applicants request Zone Change approval to rezone a +/- 7.83-acre portion of a 24.04 acre parcel from R-R-B-40 (Rural Residential Agricultural, with 40-acre minimum parcel sizes) and M-H (Heavy Industrial) to Res-1 (Single Family Residential) and M-M (Light Industrial). A 5.33 acre portion of the 7.83 acre project would be rezoned from R-R-B-40 and M-H to Res-1, to facilitate a concurrent Boundary Line Adjustment (BLA-04-26). The remaining 2.5 acre portion would be rezoned from M-H to M-M.	NOD	
2005051033	Sorensen Park General Improvements Project Los Angeles Community Development Agency --Los Angeles The project approved by the Department of Fish and Game involves the issuance of an incidental take permit (ITP) under the California Endangered Species Act (CESA). Issuance of the ITP authorizes take of Mohave ground squirrel, a state listed threatened species, in connection with the construction of a little league baseball field with bleachers and night lighting, an open lawn with four picnic tables, a restroom, and a parking lot for 40 vehicles. In total, implementation of the project will result in impacts to 3.0 acres of potential habitat for the Mohave ground squirrel.	NOD

	locations along the levees of the San Gabriel River were severely scoured, approximately 750 feet by 50 feet of the left bank upstream of Rubber Dam No. 3, and 1,100 feet by 35 feet of the right bank downstream of Rubber Dam No. 3 were damaged and are in need of repair. The proposed project involves restoring the scoured levees back to pre-storm conditions. The restoration area of the two sites totals approximately 1.75 acres. Heavy equipment such as loaders and bulldozers will be used to repair the eroded levees using onsite material. Approximately 12,700 cubic yards of material will be redistributed and the entire project impact area will be 4.42 acres. If necessary, Public Works will import material from recent debris basin cleanouts to complete the levee repair project. Public Works will avoid impacts to the protected vegetated polygons within the channel during the levee restoration. The vegetated polygons within the impacted area will be protected by grading and forming sand islands around them.		
2005098260	Amendment of Emergency Regulations for Implementation of Electronic Water Recycling Act of 2003 California Integrated Waste Management Board -- Existing law, Chapter 526, Statutes of 2003 (SB 20, Sher), as amended by Chapter 863, Statutes of 2004 (SB 50, Sher), Chapter 84, Statutes of 2004 (AB 901), Jackson), and Chapter 59, Statutes of 2005 (AB 575, Wolk), enacted the Electronic Waste Recycling Act of 2003. Title 14 California Code of Regulations, Division 7, Chapter 8.2, commencing with Section 18660.5, based on the authority of this Act, established a registration system for collectors and recyclers, a payment system for the same entities, reporting requirements for manufactures of covered electronic devices and the protection from disclosure of confidential and proprietary information submitted to the California Integrated Waste Management Board (CIWMB) by retailers, collectors, recyclers and manufacturers, as well as provide conditions for a cost-free collection opportunity and manufacturer payment take-back. After almost a year of progress operation, several administrative changes must be made to the regulations to facilitate fiscal claiming and accounting.	NOE	
2005098262	500 Center Street (known as Aliso Street Sector C Block K), Removal Action Workplan Toxic Substances Control, Department of Los Angeles, City of--Los Angeles The project activities consist of the removal of contaminated soil from two small, discrete locations at the Aliso Street Sector C Block K. The areas of excavation are 40' by 10' to a depth of 10', and 20' by 15' to a depth of 5'. The total volume of soil to be removed in the two discrete areas is approximately 204 yd ³ , or 306 tons. This estimated volume does not include the necessary sloping around the excavation if shoring is not utilized. The Site is a portion of Aliso Street, which was formerly the location of a Manufacture Gas Plant (MGP) facility.	NOE

2004121007	Los Angeles Trade Technical College 30 Year Vision Master Plan Los Angeles Community College District Los Angeles, City of--Los Angeles The 30-Year Master Plan includes implementation of the long-term development plans for the Los Angeles Trade-Technical College Campus. The project will involve the acquisition of 3.46 acres and will include the construction of 1.3 million sf of new instructional and office space on a 23-acre Campus. The projected future student enrollment will be 21,300, the same as projected for the 5-year Campus Plan.	FIN	
2005091126	Disinfection By-products Control Program Antelope Valley-East Kern Water Agency Palmdale--Los Angeles, Kern AVEK operates and maintains four potable water treatment plants (WTPs) known as the Acton, Eastside, Quartz Hill and Rosamond WTPs located in northeastern Los Angeles County and southeastern Kern County. The proposed project includes new and modified facilities needed to convert the disinfection method used at all four WTPs from chlorination of ozonation and chloramination to reduce disinfection by-products. The facilities proposed at the four WTPs include: facilities to store liquid oxygen and convert liquid oxygen to gaseous oxygen, ozone generation building, ozone contact basins, filters, chlorine contact basin, chemical storage and feed facilities, and modifications to internal access roads. The proposed modifications to the Acton, Eastside, and Rosamond WTPs would not alter the design capacity of these three plants. The proposed retrofit of the Quartz Hill WTP includes additional modifications needed to increase the plant's design capacity from the existing 65 to 90 million gallons per day. Additional improvements proposed for the Quartz Hill WTP include modifications to the flocculation/sedimentation basins and construction of a new washwater recovery basin, and additional storage facilities for alum and sodium hypochlorite.	MND	10/20/2005
2005091127	Arroyo Student Housing (UCR Project #956317-1) University of California, Riverside Riverside--Riverside The project proposes construction of an apartment-style, on-campus housing providing 500 beds in one-bedroom, two-bedroom, and four-bedroom units. A one- and two-story, three-building Commons complex would be situated central to four-story housing buildings clustered in the southwest portion of the site. These lighted intramural athletic fields are proposed in the northeastern portion of the site at the intersection of the unpaved extension of Linden Street and Valencia Hill Drive. A small parking lot at the southeast corner of Linden Street and Pentland Way would complete the site improvements. The project site consists of approximately 11 acres within the eastern part of the UCR campus and lies southwest of the intersection of Watkins Drive and Valencia Hill Drive.	MND	10/20/2005
2005091128	Kearney Basin Relocation Fresno Irrigation District Fresno--Fresno The Fresno Irrigation District proposes to relocate the current Kearney Basin, located between California Avenue and Kearney Boulevard, east of Marks Avenue within the City of Fresno to two parcels of approximately 50 acres, located on the northwest corner of Church and Valentine Avenue. Lower Dry Creek Canal runs through the property from the northeast corner and FID has determined that the new site would provide the same benefits to recharge and surface as the existing site. 2005091120	<p>Stone Creek San Diego, City of San Diego--San Diego</p> <p>Amendment to the Mira Mesa Community Plan, Maser Plan, Vesting Tentative Map, Rezone, Master Planned Development Permit, Site Development Permit, and Amendment to Reclamation Plan/Conditional Use Permit. The Stone Creek project proposes a mixed-use development as described in adopted Carroll Canyon Master Plan Element of the Mira Mesa Community Plan. The mixed-use development proposed for Stone Creek proposes approximately 50 acres of parks, open space and trails; up to 8,700 dwelling units; and up to 600,000 square feet of industrial/business park uses. Additionally, the project proposes a pedestrian-focused mixed use core which could provide additional housing, approximately 100,000 square feet of office space, and approximately 30,000 square feet of retail space. The mixed-use core would be situated approximately in the center of the project and would provide an integrated mix of retail, high density residential and office uses connected by a well-developed pedestrian system. A transit stop for the future Light-Rail-Transit (LRT) would also be located within the mixed-use core. To the east of the mixed-use core would be the proposed light industrial and business park uses.</p>	NOP	10/20/2005
2005091122	<p>New High School No. 8 and New Middle School San Bernardino City Unified School District Highland, San Bernardino--San Bernardino</p> <p>The proposed project includes the construction and operation of a new high school and new middle school on approximately 105 acres, which include the existing site of the Curtis Middle School. The high school is planned for 2,700 students supported by 300 faculty and staff. The middle school is planned for 1,200 students served by 133 faculty and staff.</p>	NOP	10/20/2005
2005091123	<p>Century Business Center Hawthorne, City of Hawthorne--Los Angeles</p> <p>Reuse and redevelopment of a 92-acre site used for manufacturing with a range of industrial, research/development, commercial, retail, and/or office uses. The site is currently developed with approximately 2.56 million square feet of buildings and industrial facilities, and most of the existing buildings will be reused. The new uses are anticipated to total up to approximately 1.92 million square feet, or 25% less than the existing square footage on the site.</p>	NOP	10/20/2005
2005092102	<p>Manteca Lifestyle Center Manteca, City of Manteca--San Joaquin</p> <p>The two primary components of the proposed project includes: 1) an approximately 715,000 square foot Lifestyle Center on 72 acres, and 2) approximately 389,000 square feet of office, hotel, and restaurant space on approximately 21 acres. These project components would be constructed in two separate phases. In general, a lifestyle center includes attributes that would support an upscale, open-air development format for quality retail, restaurants, and national specialty chain stores. The project would be developed as a Planned Unit Development (PUD) with specific development conditions and standards for future development, as defined in Section 17.45 of the City's Municipal Code. Such conditions and standards relate to architectural design, landscaping, signage and parking requirements. The proposed PUD is intended to provide a unified and visually,</p>	NOP	10/20/2005

	appealing development for all uses and tenants of the site while allowing variety and flexibility within the defined framework of restrictions. Implementation of the project would require the removal of all existing uses and structures located on-site.		
2005092103	Sierra Star Master Plan Mammoth Lakes, City of Mammoth Lakes--Mono New Master Plan to replace Lodestar Master Plan. New plan proposes 832 units, 29,000 square feet of retail and 30,000 of conference space. A total of 1,283 units would be built under the Lodestar and Sierra Star developments.	NOP	10/20/2005
2005092109	Simmerhorn Commercial Project Galt, City of Galt--Sacramento The project is the construction of approximately 470,000 square feet of regional retail uses, representing a variety of retail sales and services. The applicant proposes to divide the property into 18 saleable commercial lots (on 46.42 acres) and a remainder area of 6.22 acres to be dedicated as right-of-way for planned interchange improvement. A total of 19 buildings are proposed of various sizes. The primary user will be a Wal-Mart Supercenter totaling approximately 221,700 square feet, plus a garden center of approximately 9,978 square feet. The store will operate 24 hours per day, seven days per week. The remaining buildings will range in size from 43,000 square feet to 3,100 square feet, of which 10,200 will be occupied by three proposed fast food franchises with drive-through service, 17,000 will be occupied by three proposed sit-down restaurants, and the remaining 211,100 square feet building space to be occupied by a variety of commercial sales and service uses which may include pharmacy, financial services/bank, and professional/business services. A total of approximately 1,044 employees are anticipated to result from this project.	NOP	10/20/2005
2001062029	Sonoma Coast Trail Rehabilitation & Development Proj. - Phase II Parks and Recreation, Department of --Sonoma Supplemental Project items include: Rehabilitate portions of approximately 13,550 lin. ft. of existing trail that includes: replacement of wood steps, one puncheon, 3' x 25' wood retaining wall, 250 lin. ft. of new mowed trail, 540 lin. ft. of trail re-routes, and 3,650 lin. ft. of hardened trail surface. Installation of 3,000 lin. ft. of new boardwalk, and replacement of 4 existing pedestrian bridges with new ones.	Neg	10/20/2005
2005071030	Proposed Tentative Tract TT-05-051 (re-circulated) Victorville, City of Victorville--San Bernardino To allow for the development of a 134-lot single family residential subdivision on 35 gross acres.	Neg	10/20/2005

	equipment will be contained outside of the water channel.		
2005031128	Bocce Ball Centre Clayton, City of Clayton--Contra Costa Construction and operation of up to 10 bocce ball courts adjacent to the Clayton City Hall parking lot (UP 01-04 and SPR 05-05); and Amendment of the General Plan, Town Center Specific Plan, and zoning designations of the City Hall parcel and Community Library/Keller Ranch parcel (GPA 02-04, SPA 02-04, and ZOA 07-04).	NOD	
2005042060	Ali Hooshnam - Minor Subdivision - MS0521 Del Norte County Planning Department --Del Norte Minor Subdivision of a 2.10-acre parcel into two parcels of 1 +/- acre each. Parcel 1 has an existing residence with accessory improvements including on-site sewage, water, and driveway for access. Parcel 2 also has an existing structure. The existing structure on parcel 2 is proposed to be removed due to its condition and its location under power lines. The relocation of a new structure on parcel 2 is limited in location due to physical constraints. A Biological and Riparian Habitat assessment was prepared by Galea Wildlife Consulting for the project site. The area is located partially within the 100-year base flood elevation of the Smith River as estimated by a Registered Civil Engineer. The surrounding land use consists of residentially designated land with similar zoning. The area is a river terrace with a slightly sloping area adjacent to the river with a sharp elevation change near the easterly portion of the property. No disturbance is proposed in areas of riparian habitat, nor below the top-of-bank.	NOD	
2005052132	Pine Hollow Estates Residential Subdivision Clayton, City of Clayton--Contra Costa Subdivision of two parcels into eight lots for single-family residences, plus a project entry road. Project approvals included environmental review (ENV 04-04), zone change (ZOA 06-04), subdivision map (MAP 05-04), and site plan review (SPR 09-04).	NOD	
2005062081	Frazier Minor Subdivision PMS-04-17 Humboldt County Community Development Services Eureka--Humboldt A two-phase minor subdivision to split a +/- 1.6 acre parcel into four parcels ranging in size from 7,200 sf to 1.06 acres. The first phase will result in one parcel of 9,212 sf with frontage along Campton Road. This parcel is currently developed with a single family residence. The second phase will create parcels 2, 3 and 4. Proposed Parcel 2 is developed with a large barn and proposed Parcel 3 is developed with a shed; both will be removed. Phase 2 will gain access off Campton Road via a 20' flag utilizing a lot frontage exception §325-9 of the Subdivision Regulations. The subdivision will continue to be served by public water and sewer.	NOD

	are intended to eliminate sapling trees <12" in diameter as well as jackpots of dead/down fuels, creating a defensible space between the burn compartment and the forest adjacent to it. Preparation methods include fireline construction with chainsaws and hand tools, mowing, installation of fire hoses and placing portable water tanks at strategic locations. Noise from power equipment will occur outside of the breeding season for marbled murrelets (3/24 - 9/15). All structures within the burn units will be protected using firelines and pretreated with water or foam. If previously undocumented archaeological resources are encountered during burn preparation, work in that location shall be temporarily suspended until a DPR-qualified archaeologist has evaluated the find and tribal representatives have been consulted.		
2005098270	<p>Geotechnical Investigations for High Sierra Crossings Museum at Donner Memorial SP Parks and Recreation, Department of --Nevada</p> <p>The project is a new visitor center, parking lot and entrance road at Donner MSP. This PEF is for the geotechnical investigation necessary to properly site and design the project. The investigation will be done in two phases, with a preliminary investigation to determine the overall subsurface conditions and depth to groundwater. In phase 1, up to six borings will be advanced to a maximum depth of 20 feet to determine subsurface conditions. Soil samples will be collected for laboratory testing. Temporary piezometers will be installed in three borings to monitor groundwater levels and determine seasonal variations (for infiltration system design).</p> <p>During phase 2, additional borings (4-6) will be advanced to depths of 30 feet in the building area (~ 4 borings) and to shallower depths (10 feet max) in the parking lot and road alignment areas. If needed, 2-3 holes for percolation testing will also be drilled in the approximate areas of the proposed infiltration system (bioswales). The drill rig for Phase 1 and the shallower borings of Phase 2 will most likely be a Hollow Stem Auger, allowing for screening of the cuttings by DPR archaeologists. For the Phase 2 deeper borings, the drill rig will most likely be mud rotary to advance through the cobbles and boulders present. If mud rotary is used, all bentonite drilling fluids will be contained and recirculated. A Spill Prevention and Containment Plan will be developed to prevent releases of drilling fluids to nearby water bodies such as Donner Creek.</p> <p>Borings will be abandoned using cuttings or bentonite slurry or chips, depending on the requirements of Nevada County. The upper one foot will be backfilled with native soil. All excess cuttings and drilling fluid will be contained on site during drilling and then removed off site to be properly disposed. The piezometers will be monitored by District staff for up to one year, then be decommissioned according to Nevada County requirements.</p>	NOE

2005098274	Mt. Diablo Fire Road Repairs, 2005 Fish & Game #3 --Contra Costa Removal of berms and grading of portions of the fire road, removal of a culvert crossing, installation of a head and tail wall, and replacement of two existing culverts with one larger culvert. Issuance of a Streambed Alteration Agreement Number 1600-2005-0318-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2005098275	Refugio Creek Fish & Game #3 Hercules--Contra Costa The project includes removal of debris, dead branches, non-native vegetation, some cattails, and pruning of willows. Issuance of a Streambed Alteration Agreement Number 1600-2005-0497-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2005098276	Geotechnical Drilling Including 5 (five) Bores on the Banks of San Mateo Creek Fish & Game #3 Unincorporated--San Mateo The San Francisco Public Utilities Commission is currently in the planning phase to construct a 4,500 linear-foot tunnel to replace the existing Crystal Springs Bypass Pipeline (CSBP) located within a utility easement along Polhemus Road/Crystal Springs Road in order to improve the long-term reliability of the water transmission system in the area. The tunnel would cross under San Mateo Creek. Geotechnical borings are necessary to determine the depth of bedrock under the creek, and the subsequent depth of the tunnel. The proposed geotechnical borings involve drilling two vertical boreholes and three inclined bore holes. The tunnel will be covered under a separate Lake and Streambed Alteration Agreement. Issuance of a Streambed Alteration Agreement Number 1600-2005-0201-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2005098277	Bell Creek Riverfront Natural Park Acquisition and Improvements Mountains Recreation and Conservation Authority Los Angeles, City of--Los Angeles Acceptance of a 15,000 square-foot lot dedication/donation along the southern side of Bell Creek channel from an adjoining 19-unit development approved by the City of Los Angeles approximately one year ago. The park will provide both wildlife habitat and public access. The park will protect a wintering stopping ground for Canadian geese. Improvements include a nature trail, trailhead, and interpretive kiosk. Public access will be via Sale Avenue. Ultimately, the trail will be a stop on the future Bell Creek Trail on the Los Angeles County Flood Control Right-of-Way.	NOE

	existing north and south bulkhead walls will be assessed and rehabilitated as necessary in their current location. A trench train will be installed along the ramp apron to collect runoff and treat it via an in-line storm water filtration vault. The treated runoff will continue to an existing storm drain that discharges into the harbor. The boat wash area will also be resurfaced, and a filtered catch basin will be installed to screen boat wash runoff before it is sent to the sanitary sewer system for treatment. A vessel sanitary pumpout station will also be added to the boat wash area to service vessels using the boat ramp. Sewage from the pumpout station will also be discharged into the sanitary sewer system. Demolition and construction of the ramp will occur in two phases, with a minimum of three boat launch lanes to remain in service during construction.

2005092118	North Area Recovery Station (NARS) Permit Revision Sacramento County --Sacramento The project consists of revising the Solid Waste Facilities Permit at NARS to allow 1,300 vehicle round trips per day and 2,400 tons per day of waste. The existing permit allows 834 round trips per day and 1,800 tons per day.	Neg	10/24/2005
2005092121	2005-67 General Plan Amendment and Zoning Amendment for Ronald Harris and Valley Oaks Mall, L.L.C./Valley Oaks Holdings, L.L.C. Calaveras County Planning Department --Calaveras The applicants are requesting a General Plan Amendment to change the Valley Springs Community Plan land use designations from Industrial to Commercial for 1.16+- acres. Concurrently, a Zoning Amendment from M2 (General Industry) to C2 (General Commercial) for 0.57 of an acre of land.	Neg	10/24/2005
2005092122	Conditional Use Permit 05-007, Developmental Agreement 05-004 - Catholic High School Livermore, City of Unincorporated--Alameda The proposal is to develop a private high school campus encompassing approximately 32 acres. The campus consists of classrooms, chapel, administrative offices, performing and visual arts facilities, sports fields, and 816 parking spaces shared between three parking areas. The remaining approximately 90 acres, including both arroyos, will be permanent open space.	Neg	10/24/2005
1988012503	May Ranch Revised Specific Plan Perris, City of PERRIS--RIVERSIDE The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2004-0187-R6 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Mr. Scott Hansen of K.B. Home Coastal, Inc. For Tentative Tract Map 32262, the Phase 6 of the May Ranch Project, the Operator is proposing to grade and develop approximately 102 acres into a residential development of 337 lots and supporting infrastructure, including 3 storm drain outlets for TTM 31416. The project will widen the Perris Valley Storm Drain Channel. The project will permanently impact 4.04 acres of jurisdictional habitat.	NOD	
1989070309	Deutsch Project, Specific Plan and Environmental Impact Beaumont, City of BEAUMONT--RIVERSIDE The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2004-0219-R6 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Ms. Amy Glad of Pardee Homes. For the Sundance residential development (tentative tract maps 30332, 31468, 31469, and 31470), the operator is proposing to grade and develop approximately 1,195 acres into a residential development of 4,379 lots and supporting infrastructure. Total project impacts are 2.65 acres of non-riparian vegetated ephemeral streambed habitat.	NOD

2005098314	Commercial Gas Fryer for Foodservice/Next Generation Instantaneous Water Heater Energy Commission San Ramon--Contra Costa The purpose of this PIER contract is to develop a novel commercial gas fryer that reduces energy costs, improves performance and reduces oil consumption. Additionally, this project will characterize instantaneous water heating technology in the California marketplace, project potential market growth and energy savings, identify barriers and recommend strategies for next-generation technology.	NOE	
2005098315	Integrated Gas Production and Handling System for Renewable Fuel Simulation (UCI) Energy Commission Irvine--Orange The purpose of the original contract is to fund three microturbine generator (MTG) projects under the Public Interest Energy Research (PIER) Program to advance MTG technology to improve the cost and reliability of California's electricity. The second project's goal is to develop and demonstrate MTG combustion systems capable of operating on (1) medium-BTU content gas, (2) low-BTU content gas, and (3) liquid fuel. This amendment increases testing for this project. Increased data collection will require an increase in the number of hours of operation of the single microturbine, cited at UCI combustion laboratories.	NOE	
2005098316	Accessory Dwelling Permit, 2005-136, Araquistain Calaveras County Planning Department --Calaveras Issue a permit to allow the addition of a second (accessory) dwelling at 5405 Treosti Place, Valley Springs in Calaveras County, in compliance with Calaveras County Zoning Code, Chapter 17.66, and Government Code §65852 et al. Construction/installation of the dwelling, utility connections, and appurtenant structures is subject to all applicable codes, regulations, and permitting requirements in existence at the time of permit application(s) and/or start of construction. Permit is effective as of September 23, 2005 and expires on December 31, 2006.	NOE	
2005098317	Tehama Building - Siding Repair Parks and Recreation, Department of Sacramento--Sacramento Remove deteriorated wood siding from the exterior walls of an existing non-historic building in Old Sacramento State Historic Park, replace it in kind with new tongue-and-groove wood siding, and paint to match the existing color of the building. Replace deteriorated canopy with canvas of the same grade and style. The work is necessary due to damage resulting from extensive rot and decay throughout the siding material. The project supports maintenance and continued use of the building, known as the Tehama Building.	NOE	
2005098318	Temporary Irrigation System - Oceano Dunes SVRA Parks and Recreation, Department of --San Luis Obispo The project is a temporary watering system for the planted trees (oaks and eucalyptus) surrounding the Monarch butterfly grove. The project would consist of trenching to the depth of approximately 6 inches and installing 3/4 inch PVC pipe for a distance of approximately 200 feet. The temporary PVC water line will run from a hose bib in the campground over to the existing footbridge. The line will be	NOE

	buried approximately 6 inches under ground until it reaches the footbridge where it will attach along side the bridge. Once the line is on the other side of the creek it will again be buried approximately 6 inches. The line will then connect to an above ground drip irrigation system. This is a temporary irrigation system, once the trees have established themselves (approximately 1 to 2 years) the watering system will be removed.		
2005098319	Install Accessible Telescope in Mount Diablo State Park Parks and Recreation, Department of --Contra Costa Install viewing telescope at the Mount Diablo State Park Fire Interpretive Trail asphalt overlook area which can be used from a seated position and meets California State Park Accessibility Guidelines (CSPAG). Dig a single hole using hand tools approximately 2 feet deep in which to install the telescope. Ensure a stable and firm clear space in front of the telescope to allow for a parallel approach. Delineate accessible path of travel to telescope from a parking stall, the visitor center, or other public facility. Design of path shall conform to the guidelines of an Outdoor Recreation Access Route. Project manager shall arrange with the State Parks Accessibility Section to document, photograph, verify and inspect the ongoing work in progress, and affirm that the installation conforms with the CSPAG. If, as anticipated, the installation will be accomplished by a volunteer Boy Scout, a State Park representative shall be present at all times to guide and monitor the work.	NOE	
2005098320	Construct Carport for Bothe-Napa Valley State Park Equipment Parks and Recreation, Department of --Sonoma Construct a carport to provide shelter for equipment stored at Bothe-Napa Valley State Park, to reduce deterioration caused by inclement weather. The open-sided structure will have a wooden frame and metal shed roof and approximate dimensions of 40 feet in length by 28 feet in width and 16 feet high. Erect carport in exact location where equipment is currently being stored. Some minor ground disturbance will be required for the placement of footings to support 8 structural posts. In the event that archaeological materials are discovered during the project-related activities, work shall stop immediately and remain halted until and DPR-qualified archaeologist has evaluated the nature of the material and completed data recovery and/or protective measures for any significant cultural resources. In the event that human remains are discovered, work shall cease immediately and the project manager/site supervisor shall notify the District Archaeologist, the authorized State Representative and/or the DPR Sector Superintendent, who shall report the discovery to the County Coroner in accordance with § 7050.5 of the California Health and Safety Code. If the County Coroner determines the remains to be Native American, DPR shall immediately contact the Native American Heritage Commission for direction on appropriate action. No human remains or funerary objects shall be cleaned, photographed, analyzed, or removed from the site prior to such direction. Project supports maintenance and continued use of an existing Park facility.	NOE	
2005098321	Pacific Street, Inc., Interim Measures for Surface Soil Removal and Onsite Treatment Toxic Substances Control, Department of National City--San Diego The project will involve processing approximately 26,000 cubic yards of soil that is currently stockpiled and about 25,000 cubic yards from excavated surficial soil and	NOE

2005092123	New Police Station / Bay Meadows Gateway Residential Project San Mateo, City of San Mateo--San Mateo The project is an amendment to the Bay Meadows Specific Plan I to change the current Gateway Commercial designations and to allow the development of an approximately 45,172 square foot new Police Station on the "restaurant parcel" and 190 multi-family residential units on the "hotel parcel."	MND	10/25/2005
1997122055	Fox Hills Community Specific Plan Merced County The proposed project would result in an 850-acre expansion of the existing 391-acre Fox Hills Community Specific Plan boundary, resulting in a total Specific Plan area of about 1,250 acres. A maximum of 3,058 new dwelling units could be constructed, of which 2,098 are deed restricted for persons 55-years of age or older. An approved 402-unit subdivision now under construction is also planned to be similarly deed restricted. Nine acres of commercial mixed-use will provide for daily needs of Plan area residents without attracting appreciable traffic from outside the Plan area. The 20-acre general commercial area will be used for a mini-storage facility and outdoor RV/boat storage to meet needs of Plan Update area residents. Parks and trails total 58 acres and about 315 acres of recreational uses including existing approved and proposed golf are included. Open space includes habitat conservation area for the San Joaquin kit fox and passive recreation area. Expansion of existing utility and circulation infrastructure would take place and construction of new off-site circulation improvements is planned, with the major improvement being an interchange at the State Route 152 / Volta Road intersection.	NOP	10/25/2005
2005091135	Woodview Terrace by KB Homes Chino Hills, City of Chino Hills--San Bernardino The proposed project would be a gated community of 247 single-family detached homes on a 190-acre property. The proposed gated community is known as "Woodview Terrace" and will be developed as a planned development community. The proposed project would develop 242 new homes on the northern side and 5 homes on the southeast side of the project site. Access to the northern lots would be provided from Woodview Road that is proposed north of the project site. The	NOP	10/25/2005

	five lots on the southeast side would be accessed from Soquel Canyon Parkway. The homes on the north side would be separated from Old Woodview Road by a tubular steel fence that would be maintained by the homeowners. The proposed project would also include a realignment of the existing of the existing Woodview Road to meet the City's road standards, a proposed fire station site, a neighborhood park, a nature park, an overlook park, multi-purpose trails, a first flush and detention basins. Hiking trails, as required in the City's General Plan's Parks, Recreation and Open Space Element would also be incorporated on the ridgeline and around the proposed project. A portion of the east side of the project site is located outside of the proposed Planned Development (PD) and would be rezoned to institutional as part of the to accommodate detention basins and a fire station.		
2005091138	Rio Vista Water Treatment Plant Expansion Castaic Lake Water Agency Santa Clarita--Los Angeles CLWA proposes to expand the existing Rio Vista Water Treatment Plant (RVWTP) treatment capacity from 30 million gallons per day (mgd) to 60 mgd in response to current and proposed water quality standards, and to improve reliability to meet existing customer demands and demand from planned and approved development. Additionally, the proposed project would include modifications to the Intake Pump Station (IPS) to increase the capacity to 60 mgd. As part of the project, a parallel pipeline connection to the existing 42-inch connection to the Metropolitan Water District of Southern California's (MWD) 201-inch Foothill Feeder would be constructed. This would include approximately 200 feet of 48-inch underground pipeline and an associated meter structure.	NOP	10/25/2005
2005091142	Santa Monica College Bundy Campus Master Plan Santa Monica Community College District Los Angeles, City of--Los Angeles The Bundy Campus Master Plan is intended to provide for an essentially self-sustaining satellite campus largely operating independently of the SMC Main Campus. The Master Plan calls for: (1) demolition of the existing two-story East Building; (2) construction a New Building of similar size (approximately 30,000 sf) to be located to the immediate east of the existing four-story West Building; (3) provision of 668 parking spaces total (558 surface parking spaces and 110 subterranean parking spaces); (4) access improvements; (5) provision of a pedestrian parkway along Bundy Drive; (6) landscaping/open space elements; and (7) general site improvements. College staff concluded that the two buildings (i.e., East and West) planned for the project site would be sufficient to meet the long-range facility planning needs of the Bundy Campus.	NOP	10/25/2005
2002062111	Brockway Summit Water Quality Improvement Project Caltrans #3 --Placer The California Department of Transportation (Caltrans) proposes to rehabilitate and improve the drainage system along a 3.4km (2 mi) section of State Route (SR) 267 near Brockway Summit in Placer County. The project limits extend from 1.0 km south of Brockway Summit to Stewart Way.	Neg	10/26/2005

Neg	10/25/2005
2005091141	Seaforth Leasehold San Diego, City of San Diego--San Diego Demolish an existing 1,780 square-foot boat rental building, a 4,386 square-foot marina building, and a 4,120 square-foot sportfishing building; and construct a new 2,638 square-foot, single story boat rental building, a new 3,003 square-foot, single story marina building, and a new 4,621 square-foot, single story sportfishing building. The proposed project would also include the remodel and reconfiguration of the existing marina and sportfishing docks and reconfiguration of the existing parking lot.	Neg	10/25/2005
1995031055	Jensen's Crossing/Cobblestone Creek Development (Key Site 5) Santa Barbara County --Santa Barbara The proposed project is the Revised Orcutt Regional Retention Basin "B", recreational trail and Sewer Extension Project. The Orcutt Community Plan (OCP) identified various infrastructure improvements necessary for its implementation. The OCP EIR (97-EIR-01) certified on July 22, 1997, addressed impacts associated with development and infrastructure improvements. This action addresses certain of those proposed improvements, specifically Regional Retention Basin "B", recreational trail and sewer extension realignment. These improvements are required as conditions of approval for development of several specific key sites in the southeast Orcutt area, including Jenson's Crossing / Cobblestone Crossing, Mesa Verde, and Harp Springs. 2003062075	Cupid Row Canal Vegetation / Sediment Removal Project San Mateo County San Bruno--San Mateo The County of San Mateo is proposing to clear sediment and vegetation from an artificial watercourse known as the Cupid Row Canal, on property commonly known as West of Bayshore (WOB). The channel carries runoff from the City of San Bruno to another canal known as North Channel, and eventually discharges into San Francisco Bay. The canal starts near Huntington Avenue in San Bruno and travels easterly, through two sharp bends, for approximately 1,700 feet. From there, the channel turns north and runs approximately 2,700 feet to San Bruno Avenue, where it flows through a concrete box culvert to North Channel. The channel is natural earth and has collected sediment over time, resulting in the deposition of 3-4 feet of material along the canal reach. Cattails and tules have colonized the channel, as have numerous willows, some of which are significantly sized. All work will take place under the supervision of monitors to ensure protection of any San Francisco garter snakes, California red-legged frogs and western pond turtles that could be present. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0003-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Mark Chow / San Mateo County Department of Public Works.	NOD	
2003072005	Peninsula Medical Center Replacement Project Burlingame, City of Burlingame--San Mateo On November 15, 2004, the Burlingame City Council certified the Final EIR for a project to replace the existing Peninsula Medical Center hospital building and nearby office buildings with a new hospital, medical office building and parking garage. The existing medical offices will be demolished as a part of the project. After the replacement hospital is completed, the existing hospital will be demolished. The replacement hospital would consist of approximately 440,000 square feet in a six to seven story structure, attached to a five story medical office building of approximately 150,000 square feet. The project also includes relocation of an existing helipad on the site. A parking garage with 809 spaces would be built as part of the project, along with 681 surface parking spaces for a total of 1,490 on-site parking spaces. The main entrance to the hospital would be from Trousdale Drive opposite Magnolia Avenue. There would also be a staff entrance from Marco Polo Way, a combined staff/emergency department entrance from Trousdale Drive near Ogden Drive, and the loading dock entrance from El Camino Real. On September 19, 2005, the Burlingame City Council approved a Vesting Tentative Parcel Map to combine lots in order to implement the project described above and in response to the conditions of approval imposed on the project. The City Council also approved conditional rezoning of three of the four parcels which make up the Peninsula Medical Center site from C-1 and C-3 to Unclassified. The rezoning of	NOD

	aprons around existing roadside drainage inlets. No additional R/W will be required. No sensitive species or archaeological resources will be impacted by construction of this project.		
2005098338	<p>Repair and Repave Johnson Park Caltrans #2 --Shasta</p> <p>Caltrans proposes to repair and repave (CAPM) SR 299 in Johnson Park by placing 45 mm of rubberized asphalt concrete over the width of the existing roadway, including the shoulders. The project will add five to seven ears to the service life of the pavement, which has deteriorated and warrants treatment. No permits will be needed. Stockpiling and staging locations are designated on site at PM 77.8 and 79.0, and off site at PM 80.2.</p>	NOE	
2005098339	<p>Improve Road Conditions Lassen 395 Caltrans #2 --Lassen</p> <p>The California Department of Transportation is proposing a Capital Maintenance project to improve road conditions along Highway 395 in Lassen County, from Postmile 56.7/76.6. All work will be conducted within the fill/roadway prism section. Construction staging and storage areas will be located on existing maintenance areas or roadway turnouts. The project is broken into three segments.</p>	NOE	
2005098340	<p>Asphalt-Rubber Concrete Overlay MOD/SIS Caltrans #2 --Siskiyou, Modoc</p> <p>The California Department of Transportation and Federal Highway Administration will place an asphalt-rubber concrete overlay (45 mm) over the full width of the existing roadway, including paved shoulders. Other construction activities included in this project will be; repairing digouts, restoring count stations, raising guard-rails and upgrading the end treatments, adjusting drainage inlets to match new pavement height, and backing shoulders. In addition, all opaque road signs will be changed to retro-reflective signs and posts will be replaced as necessary. All work other than sign changes will remain within the hinge points, however, the following existing pull-outs meet CEQA and NEPA compliance for parking, staging, and material stockpiling use. No expansion of these pull-outs will occur.</p>	NOE	
2005098341	<p>California River Aqueduct Conveyance Reliability Program - Dam Sluiceways and Outlets Reliability Investigations and Assessments Metropolitan Water District of Southern California --San Bernardino</p> <p>The Metropolitan Water District of Southern California is proposing to conduct investigations and assessments for reliability of dam sluiceways and outlets at Gene Wash and Copper Basin reservoirs. Gene Wash and Copper Basin reservoirs have a sluiceway located at the bottom of the dam for reservoir dam drawdown in the event of an emergency. Investigations conducted during previous CRA shutdowns identified leakage through the valves, and corrosion and other signs of deterioration to the fixed cone valve components. The leakage and corrosion do not jeopardize the overall stability of the dam. However, the California Division of Safety of Dams requires that the valves be operational in case of an emergency reservoir drawdown. An assessment is recommended to investigate the cause of the leaks, perform a detailed inspection of the existing valves, and identify alternative rehabilitation methods and costs. This action will involve two new bulkheads to be fabricated and installed by divers to stop water flow prior to</p>	NOE

	investigation of the sluiceway. The outlet facility at Copper Basin reservoir controls water flowing out of the reservoir. The outlet facility consists of the outlet structure motor-driven slide gates, and electrical methods and costs. The investigations will consist of underwater inspection of gates and outlet gate components during a zero pump flow.		
2005098342	California River Aqueduct Pumping Plant Reliability Program - Circulation Water System Rehabilitation: Construction Project Metropolitan Water District of Southern California --Riverside, San Bernardino The Colorado River Aqueduct (CRA) is a 242-mile long conveyance system designed to transport water from Lake Havasu to Lake Mathews and includes five pumping plants. Cooling water circulates through the main CRA pump units to maintain their continuous operation. The circulation water system features strainers, which filter out debris and sediments from the cooling water to prevent clogging of the system. The existing strainers, valves and piping are original components with more than 50 years of continuous usage. Recent investigations identified degradation of the strainer components and deterioration of connecting piping. Metropolitan will perform installation and repair work for rehabilitation of the circulating water system.	NOE	
2005098343	California River Aqueduct Pumping Plant Reliability Program - Desert Water Tanks Access and Safety Improvements Assessment, Main Pump Motor Exciter Assessment, Metropolitan Water District of Southern California --Riverside, San Bernardino The CRA is a 242-mile long conveyance system designed to transport water from Lake Havasu to Lake Mathews. The CRA has been in operation for more than 60 years. Metropolitan has initiated rehabilitation of the CRA, and has identified the CRA Pumping Plant Program are: (1) Desert Water Tanks Access and Safety Improvements Assessment; (2) Main Pump Motor Exciter Assessment; and (3) Pumping Plant Vulnerability Assessment. Metropolitan proposes to conduct assessments for these three projects to (1) identify safety improvements to evaluate existing vehicular and personnel tank access, egress and safety requirements, and develop recommendations to ensure compliance with applicable federal and state safety regulations; (2) determine the best method to rehabilitate the pump plant motor excitation system, which has experienced normal wear and tear over its 60 years of operation; and (3) determine the vulnerability of facilities on the CRA to events such as fires, vehicle collision, and random equipment failure, and to evaluate the five CRA pumping plants to determine the extent to which the pumping capacity could be impacted by these postulated events.	NOE	
2005098344	Iron Gate Dam, No. 91-3 Water Resources, Department of, Division of Dams --Siskiyou A bulkhead with blind flange will be installed in the bypass tunnel to help fix the main gate in the tunnel. Part of the unlined tunnel will be shotcreted with rock anchors.	NOE

2005098351	Nominal Cost Acquisition of Three Parcels (El Dorado County Assessor Parcels Number 25-381-04 and 34-772-24; & Placer County Assessor Parcel Number 112-120-06) Tahoe Conservancy South Lake Tahoe, Unincorporated--El Dorado, Placer Nominal cost acquisition of three environmentally sensitive properties for the purpose of preserving open-space in the Lake Tahoe Basin.	NOE	
2005098352	Accessibility Modifications - Loafer Creek Campground Parks and Recreation, Department of --Butte Conduct the following modifications to increase accessibility at Loafer Creek Campground: - Campsites - perform maintenance work on 7 sites to bring them into full compliance. This will include minor leveling of site surface, widening of parking pads as needed, and fixing water stations as needed. Modify 3 additional standard sites into accessible sites. This will include minor leveling of site (6" or less ground disturbance), replacement of furniture with accessible design and accessible layout, water stations, and parking pads for sites. The concrete parking space headers (stobbers) may need to be moved to denote larger accessible parking pads. - Restrooms - replace door signage and move fixtures for accessibility. All work performed is to meet the requirements of the Americans with Disabilities Act and Consent Decree for Accessibility Lawsuit against Department.	NOE	
2005098360	Repairs to the Water Rejection Facilities at the Robert A. Skinner Filtration Plant Metropolitan Water District of Southern California --Riverside The Metropolitan Water District of Southern California proposes to conduct needed repairs that resulted from water rejection at the Robert A. Skinner Filtration Plant (Skinner Plant). The repairs would consist of three components: (1) replacement of a damaged V-ditch; (2) sediment removal from an existing concrete-lined detention basin; and (3) installation of a bulkhead over an existing drainline. When high flows were released from the Skinner Plant, on June 22, 2005, erosion undermined an existing V-ditch resulting in erosion of soils supporting the V-ditch, causing its failure, and the deposition of sediment into the retention basin immediately downstream. The proposed project will replace the V-ditch with one that is the same size but will be constructed of concreted rock material instead of the formerly smooth concrete. The deposited sediment in the retention basin will be removed so that flows can be detained as designed. Additionally, a bulkhead fitting will be placed over an existing 57-inch diameter drainline so that future rejection incidents will not flow into the drainline and flood other portions of the Skinner Plant.	NOE	
2005098361	Supplemental Storage Program Agreement with the Municipal Water District of Orange County Metropolitan Water District of Southern California --Orange The Metropolitan Water District of Southern California is proposing to enter into a Supplemental Storage Program Agreement with MWDOC to store water in addition to existing replenishment demands in the Orange County basin, and to sell water for this purpose at a discounted rate.	NOE

2005091143	Santa Maria Commons Santa Maria, City of Santa Maria--Santa Barbara A Planned Development Permit to construct a retail shopping center with five pad spaces containing 118,000 square feet in four buildings; which includes one drive-thru window for a pharmacy.	Neg	10/26/2005
2005091144	9539 Leona Ave, Leona Valley (APN3205-013-026) Los Angeles County Department of Regional Planning --Los Angeles The proposed project is a request for a Tentative Parcel Map to subdivide one parcel (10.42 acres) into three lots (5.32 ac, 2.53 ac, and 2.57 ac). The project site presently has a single family residence with an attached garage that will remain on proposed parcel lot 1. Each parcel will be accessed via individual private driveways fronting Leona Avenue. The project site is located on Leona Avenue, approximately 1 mile east of the Angeles National Forest and approximately 0.25 of a mile south of Elizabeth Lake Road, and approximately 2 mile north of the Bouquet Canyon Road within the unincorporated Los Angeles County community of Leona Valley. Surrounding land uses within a 500 ft. radius consist of single-family dwelling units and church. There is a second detached garage structure that will be removed on site. There are no oak trees on site.	Neg	10/26/2005
2005091146	Transfer of Territory to the Delhi Unified School District Merced County Office of Education Support Services --Merced A proposal to transfer roughly 340 acres of territory from the Turlock Unified School District to the Delhi Unified School District.	Neg	10/26/2005

1998031109	1997 Water General Plan Indian Wells Valley Water District The Capital Improvements and Well 34 Project consists of the construction and maintenance of the following: 1) Springer Avenue B-Zone Pipeline Project will install approximately 14,800 linear feet (LF) of 24-inch polyvinyl (PVC) pipeline and 1,300 LF of 12-inch diameter PVC pipeline. 2) Construct a 2.0 million gallon (MG) B-Zone Reservoir Tank. 3) Sunland Street C-Zone Pipeline Project will install approximately 2,000 LF of new 16-inch PVC pipeline. 4) Construct a 1.0 MG C-Zone Reservoir Tank. 5) Well Plant 34 Project will construct a 16-inch to 20-inch diameter water production well, with an anticipated depth of between 900 and 1,400 feet below ground surface. The project will result in impacts to the Mohave ground squirrel (<i>Spermophilus mohavensis</i>) and desert tortoise (<i>Gopherus agassizii</i>), species which are designated as threatened under the California Endangered Species Act (CESA). The permit referenced above as issued by CDFG authorizes incidental take of the species under CESA that may result with implementation of the project.	NOD	
2002121007	U.S. Borax Life of Mine Kern County Planning Department --Kern The 1,833 acre borax mine project will include increasing the overburden and gangue stockpile areas in both area and height as well as construction of new boric acid ponds and flood control catchment basins at the existing U.S. Borax Mine. The project will result in impacts to approximately 1,798 acres of habitat for Mohave ground squirrel (<i>Spermophilus mohavensis</i>) and desert tortoise (<i>Gopherus agassizii</i>), species which are designated as threatened under the California Endangered Species Act. The permit referenced above as issued by CDFG authorizes incidental take of the species under CESA that may result with implementation of the project.	NOD	
2005011097	Buellton General Plan Land Use Element and Circulation Element Updates Buellton, City of Buellton--Santa Barbara The proposed program would amend the City of Buellton General Plan Land Use Element to implement policy direction established by the General Plan Housing Element Update, which was adopted by the City of June 10, 2004. The proposed program is intended to satisfy the California Department of Housing and Community Development (HCD) and Regional Housing Needs Allocation (RHNA) goals for the provision of adequate sites appropriately designated for affordable housing. The Land Use Element Amendments would implement four basic means by which to address the City's RHNA goals, as established by the Housing Element Update, as follows: Second Dwellings, Multifamily Infill, Mixed Use Development and establishment of an Affordable Housing Overlay Zone. The Circulation Element would also be updated, consistent with the Land Use Element update. Improvements to the City's roadway network have been identified to serve buildout	NOD

2005098353	<p>North Bloomfield Fuel Reduction at Malakoff Diggins State Historic Park Parks and Recreation, Department of --Nevada</p> <p>Create a 300-foot defensible fuel profile zone (DFPZ) along both sides of North Bloomfield - Graniteville Road through the town site and along the eastern side of Relief Hill Road at Malakoff Diggins State Historic Park. Purpose of the project is to re-establish defensible space around the resources (in the event of a wildfire) in the project area along Humbug Creek; increase firefighter abilities to control a large fire; eventual achievement of old-growth forest characteristics. A total of 70 acres shall be treated in the DFPZ and a prescribed burn unit (less than 12 acres) will be prepared in addition to the DFPZ. The defensible fuelbreak shall include a more intensively treated shaded fuel break within 100 feet of structures. The shaded fuelbreak shall be centered on the edge of the burn unit (50 feet inside and 50 feet outside). Riparian vegetation will be retained near Humbug Creek, Blair Pond, and one seasonal tributary. Wood chips will not be spread in the creeks and pond, nor will burn piles be located in the waterways. No new skid trails will be created. Treatment shall be performed by hand crews and will include cutting of vegetation with chainsaws, chipping and burning of debris piles. No heavy equipment will be used with the exception of a chipper.</p> <p>Project will reduce the risk of catastrophic wildfire to the State Park, historical resources, private residences, and create a fire-defensible fuels complex. Adjacent residents and landowners shall be notified before work begins. All necessary burn permits shall be obtained and all department fire management policies will be followed. No burning activities will be conducted until the Draft Wildfire Management Plan for Malakoff Diggins State Historic Park is finalized, approved and on file with all proper authorities. Defensible fuel profile zone maintenance shall be required approximately every 8-10 years depending on growth rates.</p> <p>Conduct pre-construction archaeological field survey and resource inventory to identify archaeological resources that require protection necessary only in the</p>	NOE

	<p>prescribed burn unit. If the systematic survey results in the positive identification of archaeological sites and/or significant isolates, protective measures will be implemented to avoid impacts from the proposed actions of the prescribed burning. Measures will consist of delineation of the cultural resources with flagging, identification of the resources on a topographic map. Any fuel reduction in areas within and adjacent to recorded archaeological sites and cultural resource features will be limited to hand clearing and may be monitored by a DPR-qualified archaeologist. Vehicles shall be prohibited within these exclusion zones. Hand clearing will take place first in areas of identified resources and work outward to fully identify and protect the newly documented and/or extended resources. Pile burning within site boundaries is prohibited.</p> <p>If evidence of potentially significant historical/archaeology resources are discovered at any point during the project, work shall be suspended until the find can be assessed by either the District or Service Center archaeologist.</p>		
2005098354	<p>Replace/Repair Ramada in Courtyard - Petaluma Adobe State Historic Park Parks and Recreation, Department of --Sonoma</p> <p>Replace fallen ramada over the candle pot in the courtyard at Petaluma Adobe State Park to protect park visitors from rainy weather. The replaced structure will be designed to comply with the Americans with Disabilities (ADA) compliance will require that the structure be 14'x12' in size and have 48" of clearance in all directions around the existing candle pot structure. Some minor ground disturbance will occur in order to install four posts (post-hole excavations) and concrete footings. The ramada will replace/replicate the structure than collapsed. Prior to construction, the design, materials and method of construction will be reviewed by a DPR-qualified Cultural specialist. Prior to reconstructing the ramada, park maintenance staff will schedule and coordinate with the district archaeologist and have the district archaeologist on site during construction of the ramada. Maintenance staff will coordinate final design with the district historian prior to construction.</p>	NOE	
2005098355	<p>Backcountry Road Improvements - Annadel State Park Parks and Recreation, Department of --Sonoma</p> <p>Re-engineer backcountry roads at Annadel State Park to stabilize access roads, to reduce road related erosion, and restore natural landforms and ecosystems. Stabilization will include retrieval of material side cast during road construction and placing excavated material against the cutbanks and shaping it to blend with the surrounding topography. All berms, tracks, and other surface irregularities will be smoothed to encourage free draining surface flow. Excavated material, bushes and trees will be stockpiled on-site and spread as necessary on finished surfaces. Additional road treatment includes post-construction, one-time application of herbicides, Transline and Telar to control newly established invasive non-native plant species. This project will not affect the road alignment and associated rock walls and features near the road. The road will be retained with their associated features (namely the rocks embedded in the landscape and the nearby rock walls). This project will not affect any historic resources as long as the rock features and rock walls along the side of the trails are not disturbed.</p>	NOE

1999031096	Santee Town Center Specific Plan Amendment (TCSP 04-01) Santee, City of Santee--San Diego The Santee Town Center Specific Plan Amendment would enable the eastern portion of the existing Santee Town Center to be developed with approximately 2.5 million square feet of residential and commercial/office uses. The plan amendment would create options for living, working, and recreating in one central location. The proposed conceptual land use plan for the 154.05-acre specific plan amendment includes a 22-acre mixed-use area, and various current and future planning areas. The 22-acre mixed-use area would provide high-density housing (approximately 200-300 units with an estimated population of 500 to 750 residents), a 3,300-seat multiplex theater, and approximately 150,000 square feet of commercial office space. The remainder of the site (1.96 million square feet) would be developed with uses associated with a high tech corporate office campus.	EIR	11/14/2005
2005031017	Temecula Regional Hospital Temecula, City of Temecula--Riverside The proposed project includes a General Plan Amendment, Zone Change (PDO-9) Development Plan, Conditional Use Permit and a Tentative Parcel Map. The General Plan Amendment is a request to eliminate the Z2 overlay area from the General Plan, which currently limits the height of buildings along Highway 79 to 2 stories. The Zone Change is a request to change the zoning from Professional Office and DePortola Road Planned Development Overlay (PDO-8) to Temecula Hospital Planned Development Overlay (PDO-9). The proposed PDO-9 allows a height up to 115 feet for 30% of roof areas for hospital and medical offices. The Development Plan and Conditional Use Permit is a request to construct approximately 565,260 square feet of hospital, medical office, cancer center and a fitness rehabilitation center space on 35.31 acres. The Tentative Parcel Map is a request to consolidate eight lots into one parcel.	EIR	10/28/2005
2005032024	900 Minnesota Street Project San Francisco Planning Department San Francisco--San Francisco The proposed project would include the development of approximately 142 residential units, approximately 6,300 gross square feet (gsf) of office space, about 2,100 gsf of cafe space, and a 168-space underground parking garage on an approximately 2-acre site in San Francisco's Central Waterfront district. 2004042050	Marine Education Center - Addendum Parks and Recreation, Department of --San Mateo The Department of Parks and Recreation (California State Parks) proposes to make improvements to Año Nuevo State Reserve. The project consists of rehabilitation of three historic buildings, their adaptive reuse as a Marine Education Center, and related utility and site improvements. The following is a summary of the proposed work: 1. Removal of existing nonhistoric building elements, repair or replacement of missing historic fabric and construction of new elements for the proposed new use. 2. Refurbishing of historic building fabric and finishes, upgrading the existing structural system for vertical and lateral loads, and upgrading building mechanical, electrical, and plumbing systems to meet proposed uses. 3. Rehabilitation of building exterior and construction of new stairs and other exit ways to comply with health & safety codes. 4. Removal of existing modular trailer office. 5. Museum collection purchasing, cataloging, packing, moving, and storage or exhibits and objects located in various buildings throughout the park in order to protect them from construction activities and prepare them for use in interpretive exhibits. 6. New enhanced interpretive exhibits including communication, electrical, and audiovisual equipment. 7. Improvements to the site including path of travel, utility distribution systems, and fencing. 2004102064	Gauche Park Redevelopment Yuba City Yuba City--Sutter Redevelopment of the existing park, to include an aquatic center, indoor sports facility and open park on the existing 6.55 acre park site.	NOD	
2004121141	Alhambra Park Interactive Spray / Water Park Project Alhambra, City of Alhambra--Los Angeles Replacement of existing children's wading pool with interactive spray / water play apparatus. Existing wading pool does not meet current health or environmental regulations for operation and has been closed for over 3 years. Adding an interactive spray/water play area will provide activities for those smaller children who cannot utilize the large swimming pool which is also at this same location.	NOD	
2005051079	Granada Park Restroom / Snack Bar Construction Project Alhambra, City of Alhambra--Los Angeles Renovation of restroom/snack bar facility to include new interior plumbing, new water and sewer services, installation of new fixtures including water closets, lavatories, and toilet partitions.	NOD	
2005071023	New Well Project Exeter, City of Exeter--Tulare A new municipal well that will be connected to a new water main. The well site measures 45' by 45'. The well was drilled to a depth of 615' and produces 350gpm.	NOD	
2005081022	Gateway Reservoir and Water Transmission Line Project Mission Springs Water District Desert Hot Springs--Riverside The proposed project will connect existing water supplies to a new 4 million gallon (MG) reservoir to be connected at the existing Gateway Reservoir site. The project includes the installation of a water transmission line from a well constructed as part of an approved urban development known as the Stone Ridge Specific Plan to the proposed reservoir. The pipeline will be placed in Worsley Road, Pierson Boulevard and Salton View Road. A portion of the pipeline will be located within moderately disturbed native habitat within the Stone Ridge property and highly disturbed habitat at the Gateway site.	NOD	
2005082064	West A Street Realignment-Hesperian Blvd to Golf Course Rd Hayward, City of Hayward--Alameda The proposed project includes realignment of 1,900 ft. of West A Street from the intersection with Hesperian Boulevard to Golf Course Road through the Hayward Executive Airport property. Skywest Drive will also be realigned to intersect with the proposed West A Street alignment. West A will have four lanes until it reaches the intersection with Skywest, where the road will taper to three lanes (two eastbound and one westbound). West A will have two lanes after the intersection with Golf Course. Access driveways will be constructed for the property planned for redevelopment southwest of the intersection of Hesperian Boulevard and Golf Course Road. A gated access driveway will be provided for the Hayward Executive Airport and a cul-de-sac will be constructed at Skywest Drive south of the proposed West A Street alignment. A traffic signal will be installed at the new intersection of West A Street and Skywest Drive and signal modifications will be made at the	NOD

	intersection of Hesperian Boulevard and West A Street. Existing pavement on Golf Course Road and Skywest Drive and a small section of airport parking will be removed to allow for the new alignment. Street lighting and landscape medians will be provided along the proposed roadway.		
2005098268	Streambed Alteration Agreement (1600-2005-0415-R5) Regarding Morning Canyon Stabilization and Restoration Project Fish & Game #5 Newport Beach--Orange The Operator proposes to alter the streambed and banks by the reconstruction and restoration of Morning Canyon channel through the use of grade control structures. Seven grade control structures are proposed along the canyon to restore the stream invert to its original grade, and to establish an equilibrium slope to prevent future erosion and bank failures. The grade control structures are proposed to be rock-filled gabion baskets. Each structure would include a 3-foot vertical drop height, and a length of approximately 35 feet. The banks of the gabion structures vary from 5 feet to 6 feet in height, and are designed to contain the flow from a 100-year frequency storm event. The voids in the rock-filled gabion baskets are proposed to be backfilled with soil and re-vegetated to restore the canyon to a more natural channel system.	NOE	
2005098283	Development Review Permit DR-05-19 Santee, City of Santee--San Diego Construction of a new 2,871 square foot one-story retail store, on a previously developed, 11,430 square foot lot in the GC - General Commercial zone.	NOE	
2005098366	Siren Retrofit Parks and Recreation, Department of --Orange To provide a more reliable service of the public warning siren system, the San Onofre Nuclear Generating Station (SONGS) will replace the existing siren speakers, change out power supply with solar power, remove ground-installed switching cabinet and place all systems onto the existing wooden pole.	NOE	
2005098367	Backcountry Culverts Parks and Recreation, Department of --Orange Replacement of two 36" culverts lost to storms, one 20' by 36" culvert extension to ensure safe passage, and installation of a drainage lense to move seepage water under a road to maintain a dry surface in the upper El Moro Canyon. Both Southern California Edison and State Parks are involved in this access maintenance project.	NOE	
2005098369	Fire Prevention Standards for Electrical Utilities, 2004 Forestry and Fire Protection, Department of -- Amendments to Fire Protection regulations under 14 CCR 1251-1257 regarding vegetation clearing maintenance requirements for existing powerlines facilities used to provide electric power. Adopted changes address elimination of redundant language; providing more updated information to utility companies on locations where the regulation is applicable; elimination of the set calendar dates under which the regulation applies in favor of a more flexible time frame; clarifications on the standards for minimum vegetation clearing around utility lines; and clarifications on the conditions under which vegetation clearing is exempt from these regulations.	NOE

	within the Venice Specific Plan, a Site Plan Review, a Coastal Development Permit for construction within the Venice Coastal Zone, and a Conditional Use to permit public parking in the R zone and access from a more restrictive zone, requiring the demolition of a one-story commercial building and the removal of nine significant trees.		
2005091159	Cerro De Avila / Shear Edge Development SUB2004-00259 San Luis Obispo County --San Luis Obispo Request by Shear Edge Development for a vesting tentative tract map/Development Plan/Coastal Development Permit to subdivide an existing 0.67 acre parcel into twelve parcels ranging from 784 square feet to 4,658 square feet each for the development of fourteen individual sellable and rentable residential units within nine separate buildings. The project will result in the demolition of the existing schoolhouse building and grading of the site resulting in disturbance of the entire 0.67 acre parcel. The project includes off-site street improvements which include widening and installing curb, gutter, and sidewalk along San Luis street. The proposed project is within the Residential Multi-Family land use category and is located at 190 San Antonia Street, on the corner of San Antonia Street and San Luis Street in the community of Avila Beach. The site is in the San Luis Bay (coastal) planning area.	Neg	10/28/2005
2005091160	Garcia / Sprint Development Plan San Luis Obispo County Morro Bay--San Luis Obispo Construction of an unmanned wireless communications facility consisting of 2 panel antennae located inside a 35-foot high, 12-inch diameter pole, and associated equipment located at base of pole.	Neg	10/28/2005
2005091162	EA KM 1-05; CUP #97, Map #231 (PPO 5250) - Equestrian Facility Kern County Planning Department --Kern CUP 97, Map 231 - A Conditional Use Permit to authorize development of an equestrian facility to allow the boarding of horses and riding and training lessons.	Neg	10/28/2005
2005091163	Forrest Development Project Monterey County Planning and Building Inspection --Monterey The proposed project is a combined Development Permit consisting of (1) a Use Permit to allow the construction of two new two-story single-family residences of approximately 1,770 square feet and 1,080 square feet; each structure has an attached garage, on 30% slopes; and (2) a Use Permit for the removal of 65 protected Oak Trees. The development will require a new 300 foot driveway; approximate amount of grading for the project is 580 cubic yards of cut and 460 cubic yards of fill. Development of the project includes the restoration of a previously graded site and the replacement of illegally removed Oak Trees. Consideration of the combined Development Permits would allow the County the opportunity to correct a grading violation for the illegal grading of an access road on slopes greater than 30% and for the removal of native vegetation and illegal removal of 21 Live Oak trees as documented in code enforcement files (CE010136 & CE010143). 2005052023	North Plumas Lake Production Wells 2 and 3 and Interim Water Treatment Plant Olivehurst Public Utilities District --Yuba Construction and operation of two production water wells; construction and operation of a temporary 1.4 million gallon per day water treatment plant to serve approved urban land uses within the North Plumas Specific Plan area.	NOD	
2005071020	Sesi Property Closure Project, Otay Mesa Area, San Diego, California San Diego County San Diego--San Diego The project proposes the closure of a former landfill site on a 35.1-acre property pursuant to the implementation of a Removal Action Workplan (RAW) under the California Health and Safety Code. The project will cover the landfill waste with a low permeability soil layer and install drainage facilities to minimize surface water infiltration in the location of the buried waste. Grading and excavation will impact approximately 9.3 acres of the project site. Mitigation measures include revegetation of the landfill cover and revegetation/enhancement of riparian areas in adjacent drainages to Spring Canyon, and the dedication of a conservation easement over the portions of the property within the boundaries of the City of San Diego MHPA. The project site will be monitored in accordance with the RAW for biological and water quality performance.	NOD	
2005072160	Proposed New Richfield Elementary School, 23773 River Road, Corning, Tehama County, California Richfield Elementary School District Oroville--Tehama The Richfield Elementary School District has an immediate need for an elementary school. This is considered a small necessary school that will fulfill the public education requirements for the area. It is anticipated that the school would likely have an eventual student enrollment of about 220. The existing Richfield Elementary School must be vacated based on potentially hazardous environmental conditions (e.g., location near a pipeline).	NOD	
2005081017	Mt. 2005041064	Conditional Use Permit No. 05-10 Kings County Kettleman, Avenal--Kings The proposed project will provide additional disposal capacity for hazardous waste at KHF by providing a vertical and lateral expansion of the existing hazardous waste landfill (B-18) and a new hazardous waste landfill (B-20). Expansion of the B-18 Landfill would provide approximately 4.8 million cubic yards of additional airspace, achieved by construction of lined berms around the existing landfill. The modified B-158 Landfill will cover ~64 acres and raise the final elevation of the landfill from 965 feet to approximately 1,018 feet above mean sea level. The B-20 Landfill will have a footprint of ~63 acres and provide ~14.3 million cy of gross airspace. This landfill is planned to be operational when the B-18 Landfill reaches capacity. Under the proposed project, hazardous waste and other routine operations will continue 24 hours a day, 7 days a week.	NOP	10/31/2005
2005091172	Mesa Ridge Townhomes Oceanside, City of Oceanside--San Diego The proposed project is a Zone Amendment, Tentative Tract Map and Development Plan for 67 multi-family attached townhomes.	NOP	10/31/2005
2005091174	Change of Zone (No. 05-04), Tentative Subdivision Map (Rosswood) El Centro, City of El Centro--Imperial The proposed project "Rosswood Subdivision" will consist of 150-153 low-density, single-family residential lots, a park area, and a storm retention area, situated on 40+/- acres of land, located at the southeast quadrant of Ross Avenue and Alder Canal, adjacent to the eastern City of El Centro city limits. The project would require an Annexation, Change of Zone, and Tentative Map.	NOP	10/31/2005
2005091175	Lambert Ranch General Plan Amendment and Zone Change (Planning Area 6) Irvine, City of Irvine--Orange The proposed project consists of a General Plan Amendment and Zone Change to allow for the development of 168 single-family residential units on approximately 51 acres of land.	NOP	10/31/2005
2005092151	Oat Hill Master Plan EIR American Canyon, City of American Canyon--Napa The City of American Canyon is proposing to develop and adopt a Master Plan for approximately 364 acres in the Oat Hill area of the City. The Master Plan will contemplate development scenarios which will serve as in-fill between residential areas to the south and the Green Island Business Park and Napa County Airport to the north. The Land Use Plans propose a combination of residential, commercial, light industrial, and public uses as well as up to 1,611 new dwelling units.	NOP	10/31/2005
2005092152	South River Road Barge Canal Crossing and Village Parkway Extension Project West Sacramento, City of West Sacramento--Yolo The City is considering a project to widen South River Road from Business 80 to the Yolo Barge Canal, construct a new crossing over the barge canal, and extend Village Parkway to connect to the new crossing. The new four-lane crossing will carry vehicles, bicyclists, and pedestrians over the canal and will include provisions for pedestrian trails along the canal.	NOP	10/31/2005

	riparian vegetation. Total project impacts are 3.353.		
2005099079	EA39770 Tentative Tract Map No. 32863 Riverside County Transportation & Land Management Agency --Riverside A Schedule B subdivision of 4.58 acres into 7.5 acre lots and deed a former private street to three adjacent parcels.	NOD	
2005098384	Bear River Mill Site Removal Action Workplan Toxic Substances Control, Department of Grass Valley--Nevada The Removal Action Workplan (RAW) was prepared to address the remediation of waste, predominantly mine waste rock (MWR) from historical mining activities at the Site, as a component of a Voluntary Cleanup Agreement between Bear River Development Company (BRDC) and the Department of Toxic Substances Control (DTSC). The RAW identified the media of concern for the Site. These were" - Arsenic in Mine Waste Rock at the Galena, Bullion, Valley Veneer, and Bear River Mill areas. - Arsenic and lead in suspected mine mill tailings at the Valley Veneer area, and - Arsenic in the eight waste piles at the Bear River Mill area. 2005098385	Table Rock Trail Re-Route Parks and Recreation, Department of -- Reconstruct and re-route failed sections of the Table Rock Trail in Robert Louis Stevenson State Park to provide barrier free access through trail realignment, and reduce erosion and sedimentation. Drainage swales will be installed, rock armoring imported and re-routes will be constructed along the trail to enhance accessibility and trail drainage. The portions of road that are in evidence on the 1943 USGS map will not be removed by this project. Stabilization of non-historic roadbed will occur wherever possible as visitor use is directed to the approximate 2 miles of reconstructed trail. District archaeologist will be consulted prior to trail construction. Trail will be realigned in the event any cultural sites are found within the proposed trail corridor. Trail design and construction will follow the Regulatory Negotiation Committee on Accessibility's Guidelines for trails. Project improves accessibility and supports continued use and maintenance.	NOE	
2005098388	Marsh & Burma Trail Improvements - Annadel State Park Parks and Recreation, Department of --Sonoma Reconstruct failed sections of the Marsh and Burma Trails in Annadel State Park to improve drainage and reduce erosion and sedimentation. Work will: install drainage swales; reconstruct rock armoring in trail segments that have failed; and decommission and reroute sections of the South Burma Trail. Prior to construction, all known historical and cultural sites within the project area will be relocated and avoided during trail construction. This project will not affect any associated rock walls and features near the trail. In the event previously undetected cultural resources are encountered during construction, work within the immediate vicinity of the find will be temporarily halted or diverted until a DPR-qualified archaeologist has evaluated the find and implemented appropriate treatment and disposition of artifact(s). Trail design and construction will follow the Regulatory Negotiation Committee on Accessibility's Guidelines for trails. Project increases visitor accessibility and supports continued use and maintenance.	NOE

2005098389	Bradford Culvert and Bank Work Fish & Game #2 Placerville--El Dorado Culvert replacement and bank stabilization work.	NOE	
2005098390	Clear Debris, Trash, Sediment, and Vegetation from Three Culverts Fish & Game Eastern Sierra-Inland Deserts Region Big Bear Lake--San Bernardino The applicant proposes to clear debris, trash, sediment and vegetation from three 24-inch corrugated metal pipe (CMP) culverts that run under Highway 18/Big Bear Boulevard for the purpose of establishing flow of the three culverts. The project will temporarily impact 225 square feet or 0.0052 acres of streambed and vegetated riparian habitat. SAA# 1600-2005-0118-R6	NOE	
2005098391	Gas Pipelines 300B and 190 Integrity Work Project Regional Water Quality Control Board, Region 5 (Central Valley) --Fresno PG&E will excavate a section of two existing parallel pipelines to examine the condition of the pipes, clean off any corrosion, and apply a protective coating. The pipelines are approximately two feet apart from each other. Approximately 90 feet of each pipeline needs to be inspected and recoated with a protective coating to prevent corrosion. A portion of the pipelines crosses through Los Gatos Creek. The excavated area will be approximately 90 feet long, 20 feet wide, and three feet deep. In addition, three new pipe anchors will be installed to hold the pipeline in place when the creek flows. The anchors consist of brackets that wrap around the pipe and are attached to two 6-inch steel poles that are driven approximately 22 feet into the ground. Work will be performed during dry conditions. Following recoating of the pipelines and installation of the anchors, the excavated area will be returned to its original contour.	NOE	
2005098392	Gas Pipeline 300A Project Regional Water Quality Control Board, Region 5 (Central Valley) --Fresno PG&E will excavate a section of existing pipeline to examine the condition of the pipe, clean off any corrosion, and apply a protective coating. Approximately 90 feet of the pipeline needs to be inspected and recoated with a protective coating to prevent corrosion. A portion of the pipeline crosses through Los Gatos Creek. The excavated area will be approximately 90 feet long, 8 feet wide, and 2 feet deep. Work will be performed during dry conditions. Following recoating of the pipeline, the excavated area will be returned to its original contour.	NOE
